

17、docker命令小结

+ ::

docker save和docker load

- save: 是将本地镜像压缩成本地tar压缩包
- load: 是从一个本地tar压缩包加载成本地镜像

```
[root@kuangshen tomcat]# docker save --help
Usage:  docker save [OPTIONS] IMAGE [IMAGE...]

Save one or more images to a tar archive (streamed to STDOUT by default)

Options:
  -o, --output string  Write to a file, instead of STDOUT
[root@kuangshen tomcat]# docker load --help
Usage:  docker load [OPTIONS]

Load an image from a tar archive or STDIN

Options:
  -i, --input string  Read from tar archive file, instead of STDIN
  -q, --quiet         Suppress the load output
[root@kuangshen tomcat]#
```
